

PAC CPPTT Draft Mission Statement and Scope 11/20/2019

The OMS Transmission Planning Work Group (TPWG) appreciates the opportunity to respond to the Coordinated Planning Process Task Team's (CPPTT) Draft Mission Statement and Scope produced prior to and refined during the November 13th CPPTT meeting. The TPWG hopes that the conversations and presentations associated with this task team will be educational and beneficial for all stakeholders involved.

The OMS TPWG's main concern, which was adequately discussed and is adequately represented in the Draft Mission Statement, is that the discussions that the CPPTT undertakes do not intentionally discuss any issues that fall within the RECBWG's purview. The OMS TPWG would ask that the work and conversations of this Task Team remain properly channeled in accordance with the Draft Mission Statement.
