

Out-Year CIL-CEL Study Scope

Stakeholders are asked to submit feedback on whether additional Local Resource Zones (LRZs) should be added to the CIL/CEL analysis by December 11.

The OMS Resources Work Group (OMS RWG) requests that MISO provide additional information to better understand why the LRZs that will be reviewed in the out-year CIL/CEL analysis have changed from the previous year. For the 2024/2025 CIL/CEL analysis, export analyses were performed on LRZs 2 and 8, yet no export analyses are proposed this year. What changes in those LRZs have led MISO to the conclusion that out-year export analyses are no longer needed for those LRZs? Additionally, what changes have occurred in LRZs 1 and 4 that warrant an import analysis performed on those LRZs when none was recommended last year? This does not represent a position of the OMS Board of Directors.
