

DERTF: Dispute Resolution (IR070) (20211101)

During the November 1, 2021 Distributed Energy Resources Task Force (DERTF) meeting, MISO discussed the Order language regarding dispute resolution. Stakeholder feedback is requested on the presentation.

---

The Organization of MISO States Distributed Energy Resources Workgroup (OMS DERWG) appreciates this opportunity to provide feedback on the dispute resolution process outlined by MISO. The OMS DERWG would appreciate further discussion of this topic at the January RERRA workshop. The OMS DER WG is open to working through case examples or joint presentations as needed to prepare for that conversation. As MISO has noted, there are multiple areas in which potential disputes could occur and a clear understanding of where disputes should be directed will be essential. The OMS DERWG agrees that any existing dispute resolution processes that MISO anticipates using for these processes should be as closely mirrored to existing MISO processes as possible (or enhanced or adapted as appropriate.)

### DERTF: Use Case Studies (IR070) (20211101)

During the November 1, 2021 Distributed Energy Resources Task Force (DERTF) meeting, MISO discussed new Use Case examples. Stakeholder feedback is requested on the use cases presented.

---

The OMS DERWG appreciates the work to date on use cases and continues to encourage further development on these examples. Additionally, the OMS DERWG appreciates examples where wholesale and retail DER are utilized to work through examples where double counting could occur and need to be addressed by both MISO and RERRAs. It would also be helpful for MISO to include examples of potential disputes that may arise under each use case to help stakeholders better understand potential issues, roles, and proposed resolution processes.
