

## DERTF: Use Case Studies (IR070) (20210830)09/15/2021

During the August 30, 2021 Distributed Energy Resources Task Force (DERTF) meeting, MISO discussed four Use Case examples. Stakeholder feedback is requested on the use cases presented.

### **Use Cases**

At this time the OMS DER WG does not have specific use cases it would like to have added. However, within each relevant use case, it would like MISO to specify whether that DER is also participating in a retail program, and if so, walk through the implications of that dual participation for each use case. The OMS DER WG appreciates the approach MISO is using to work through issues in related to Order 2222 compliance. This feedback does not constitute a position of the OMS Board of Directors.
