Resources Work Groups
Response to RASC Feedback Request
Submitted on April 30, 2026

In the April 15, 2026 meeting of the Resource Adequacy Subcommittee (RASC), MISO discussed needed updates and revisions to Module E-2 of the Tariff to address Resource Adequacy Requirements (RAR) for new MISO Load Serving Entities (LSEs).

The OMS Resources Work Group (RWG) provides this feedback to MISO regarding revisions to Module E-2. **This feedback is from an OMS work group and does not represent a position of the OMS Board of Directors.**

The RWG appreciates MISO adding a term to the Tariff to represent the effective margin relative to the Final PRMR. The term MISO proposes to add only relates to the entire MISO system. The RWG recommends that MISO and stakeholders explore the value of adding parallel terms in Module E-1 for effective margin of the subregions after the Final PRMR is established with PRA and for participants using the RBDC Opt-Out Adder.
