

SPP RSC/OMS Liaison Working Group  
September 11, 2018  
10:00 – 11:00 central  
Agenda

- 10:00 – 10:05 Introduction and Review of the History of the Initiative (previously shared documents attached)
- 10:05 – 10:30 Develop Joint Goals – the following are draft ideas to begin the discussion
- Increase benefits to ratepayers in both markets by improving efficiency of market-based transactions and operations across the seam.
  - Ensure equal consideration of beneficial inter-regional projects that enable the spread of benefits along the seams, as well as throughout both markets more broadly.
  - Improve RTO relations through state-led cooperation.
  - Others?
- 10:30 – 10:40 Consider Development of Guiding Principles (draft attached)
- 10:40 – 10:55 Develop Plan
- Overall timeline (is there an end date we should target?)
  - Prioritize and define timing of goals (long and short term)
  - Staffing
  - How often to meet
    - At NARUC meetings?
  - Prepare a plan and timeline, which could include:
    - Evaluate currently available information
    - Identify key differences that impact efficiency between MISO and SPP, which could include:
      - View of transmission service (network v. point-to-point)
      - How to react to market-to-market price signals
      - Role of stakeholders and stakeholder processes/filing rights
      - Cost allocation of regional projects (benefits considered, treatment of reliability projects)
      - Capacity constructs
    - Identify information needs
      - What is needed from RTOs?
      - Do we need an independent study and if so, what would it do?
        - Benefits from increased efficiency
        - Optimal transmission planning/infrastructure
        - Geographic diversity benefits
- 10:55 – 11:00 Schedule Next Meeting and Activities
