

Market Monitor Analysis

Daniel Hall & Shari Albrecht
OMS Annual Meeting
October 24, 2019

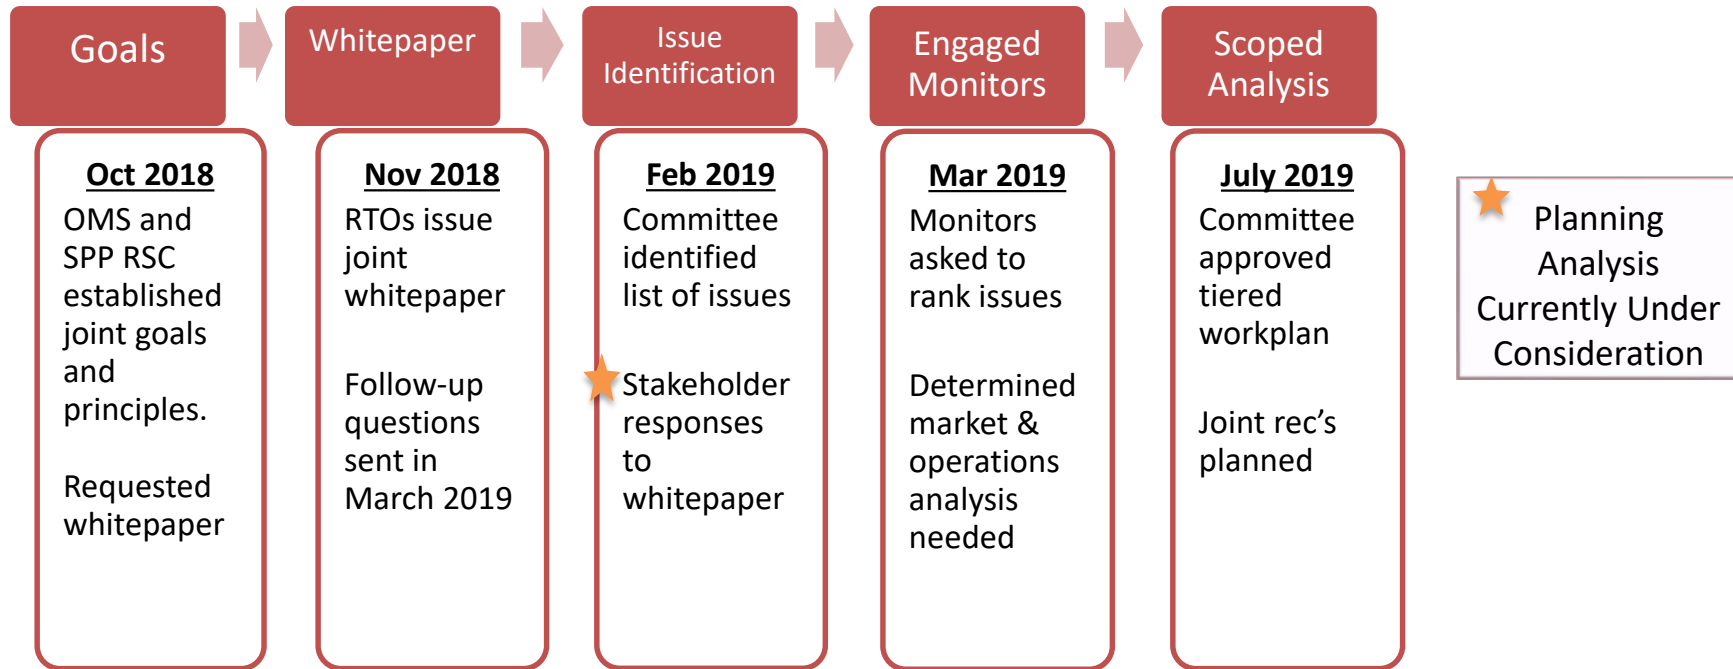

Organization of MISO States

Goals of Seams Initiative

- Increase benefits to ratepayers in both markets by improving market-based transactions and operations across the seam.
- Ensure equal consideration of beneficial regional and inter-regional projects in transmission planning, including evaluation of projects identified in the Coordinated System Plans.
- Support the timely interconnection of new resources that includes consideration of the dynamics of the interconnection queue in both RTOs.
- Improve inter-RTO relations through state-led cooperation.

Committee's progress to date

Market Monitor Issue List

Nine Issues Identified

- 1) Market-to-Market Coordination
- 2) Targeted Market Efficiency Projects
- 3) Interface Pricing
- 4) Interchange Optimization
- 5) Regional Directional Transfer Limit
- 6) Outage and Day-Ahead Coordination
- 7) Rate Pancaking
- 8) Joint Dispatch
- 9) Market-to-Market Firm Flow Entitlements

Tier 1 Issues

- SPP MMU to investigate Rate Pancaking
- MISO IMM to analyze Market-to-Market and Joint Dispatch

Tier 2 Issues

- To begin after completion of Tier 1 analysis
- Scope & timeline of analysis will be reviewed and approved by committee first

Parking Lot Issues

- Determined to have limited potential value, or unlikely implementation
