

OMS Resource Adequacy Summit 2.0 **May 15-16, 2023**

Events will take place at **The Magnolia Hotel St. Louis**
421 N 8th St, St. Louis, MO 63101

Times are **Central Daylight Time** and subject to change

Monday, May 15

The State of Play – A review of the balance between state and RTO responsibilities related to Resource Adequacy. Panels will discuss the current challenges facing the MISO footprint and industry as a whole and introduce the potential solutions that need to be considered.

1:00 – 1:15

Evolution of the MISO RA Construct – Marcus Hawkins (OMS)

1:15 – 2:30

Resource Adequacy Landscape – *Panelists will discuss the challenges to maintain resource adequacy both nationally and within the MISO region. A discussion of near-term risks and how states, grid operators, and the industry must collaborate to navigate uncertainty and maintain reliability.*

- Todd Ramey (MISO), Jim Robb (NERC), *Moderator:* Dan Scripps (MI PSC)

3:00 – 4:30

Solution Set – *Panelists will discuss how markets, the transmission system, and the methods used to value capacity and establish a resource adequacy standard are all changing and interconnected.*

- David Patton (Potomac Economics), Christina Hayes (ACEG), Kevin Carden (Astrapé), *Moderator:* Julie Fedorchak (ND PSC)

5:00 – 7:00

Welcome Reception

Salt & Smoke, 501 Clark Avenue | *Light appetizers & drinks will be served*

Tuesday, May 16

7:00 – 8:15

Breakfast

Market & Modeling Madness – A review of the many changes currently being considered for Resource Adequacy assessment, requirements, and market rules across the country. Hear from industry experts that are developing new techniques to establish metrics, accreditation methods, and designing market products.

8:15 – 8:30

Recap Day 1 & Preview Day 2

8:30 – 10:00 **Industry Analytics** – *Panelists will share their work on developing tools to define and measure resource adequacy. The latest work to develop methods to assign credit to resources to meet these requirements will also be discussed.*

- Aidan Tuohy (EPRI), Priya Sreedharan (GridLab), Arne Olson (E3),
Moderator: Tyler Huebner (PSCW)

10:30 – 12:00 **Regional Review** – *Panelists will discuss the resource adequacy challenges facing CAISO, NYISO, PJM, and the West and share the solutions that are being considered and the parties involved in analyzing and implementing them. Panelists will also highlight the role of state regulators and policy makers in addressing resource adequacy issues.*

- Nick Pappas (NP Energy), Bill Berg (Constellation), Sarah Edmonds (WPP), Alan Ackerman (CES), Moderator: Sarah Freeman (IURC)

12:00 – 1:00 Lunch

Bridging the Divide – A look at changes to resource planning processes, wholesale markets, and the transmission system that could support resource adequacy as part of a suite of solutions. Experts will discuss the important connections between all of these areas and state resource planning activities.

1:00 – 2:30 **State & Utility Planning Processes** – *Panelists will discuss how states and utilities are modifying their planning processes considering changes to their resource mix and MISO requirements. Further discussion will investigate how these processes interact with MISO requirements.*

- Laura Beauchamp (Entergy), Drew Siebenaler (Xcel), Andrew Meyer (Ameren), Brian Granahan (IPA), Moderator: Lori Cobos (PUCT)

2:45 – 3:30 **Regulator Rapid Fire** – State regulators from throughout the MISO region share their top concerns and questions about resource adequacy.

3:30 – 4:30 **Concluding Conversation** – *A discussion that reviews what was learned over the past two days, contemplates next steps, and reviews ongoing work and future resources that can help inform decision makers.*

- Zak Joundi (MISO), Jess Kuna (NREL), Eric Vandenberg (FERC)
Moderator: Marcus Hawkins (OMS)
